

Supplemental Table

Table 15 STROBE statement checklist.

Item	Description
Title and abstract.	The study design is included in the abstract. The abstract included an informative summary of the study.
Introduction. Background.	There was an introduction to present the current topic.
Introduction. Objectives.	Specific objectives were described at the end of the introduction.
Methods. Study design.	It's described in the methods.
Methods. Setting.	Periods of recruitment and follow-up were described (2016–2019).
Methods. Participants.	The way of patient selection was described, including the selection process.
Methods. Variables.	Outcomes, exposures, and predictors were defined.
Methods. Data sources.	Data sources were described.
Methods. Bias.	It was explained in methods.
Methods. Sample size.	Sample size measurement was described.
Methods. Quantitative variables.	They were explained in the statistical section in methods.
Methods. Statistical methods.	All statistical methods were explained.
Results. Participants.	Graph 1 and the results summarize the participants.
Results. Descriptive data.	Characteristics of the patients and excluded patients were reported.
Results. Outcome data.	The number of events was reported in the study time.
Results. Main results.	Crude and adjusted results were presented.
Results. Other analysis.	Sub-analysis was described in the results.
Discussion. Key results.	They were summarized.
Discussion. Limitations.	They were included.
Discussion. Interpretation.	Results are interpreted and discussed.
Discussion. Generalizability.	External validity was analyzed.
Funding.	Founding sources are included.
